| This comment relates to the Durham/Orange County (NC) Light Rail project. I object to the planned Farrington Road ROMF facility because the existing noise impact studies are insufficient. As the project progressed, GoTriangle gradually and reluctantly disclosed more and more noise that will emanate from the facility. Only recently have residents learned that trains will generate 136dBA of track squeal each time they make the tight turns when they enter the facility or the maintenance building. Also only recently disclosed was ongoing noise of 99dBA apparently due to electric generators. | |
