This comment relates to the Durham/Orange County (NC) Light Rail project object to the planned Farrington Road ROMF facility because it will reduce home values in surrounding neighborhoods. The proposed site is located in a residential area. There are no commerciator industrial properties anywhere nearby. There will be insufficient transitional protections between the propsoed industrial site and the surrounding homes. Some houses will be less than 200 feet from the site. Their property values will diminish massively. GoTriangle has not carried out a devaluation study.	e
